

The **SGS & RSA WIND ENERGY PARTNERSHIP** provides you with a one-stop shop to source the full range of products and services provided by two of the market leaders so you can:

- Enjoy reduced exposure to loss and damage
- Achieve fair insurance premiums
- Mitigate the loss of earnings as a result of failures or accidents in wind farms

SGS & RSA ARE **WORKING TOGETHER** IN THE WIND ENERGY SECTOR

SGS - Technical experts in project certification and inspection services within the wind energy sector

RSA - Insurance experts for wind turbine manufacturers, wind farm owners, and utility companies

We already successfully work together on a number of projects within industrial services.

SGS

- A global presence offering inspection, verification, testing, and certification services for onshore and offshore wind farm projects
- Provides independent services by carrying out onshore/offshore wind farm project certification services consisting of:
 - Design basis and site assessment (due diligence)

- Site specific design of wind turbine and foundation
- Manufacturing surveys and supervision
- Installation monitoring and supervision including marine warranty surveys
- Commissioning monitoring and supervision
- In-service maintenance management

MINIMISES failure rates in the operational onshore and offshore wind farms

MAXIMISES the owner's internal rate of return on investment

BENEFITS project owners, financiers and insurers with considerable stakes in onshore and offshore wind farms.

RSA

- A leading multinational insurance group that has helped clients to protect themselves against the risks they face for nearly 300 years
- Leading renewable energy insurer, with an in-depth understanding of the renewable energy industry, that has provided insurance coverage on onshore wind turbines for over 30 years and on offshore wind farms for over 15 years

PROVIDES seamless cover on all wind farm projects from planning through to operation for both material damage and subsequent financial losses

SUPPLIES fast and efficient claims service with specialist engineers and loss adjusters focusing heavily on risk management/control and speedy claims resolution
