

TO WHOM IT MAY CONCERN

In 2005, RZB commissioned **SGS Austria Controll Co-GmbH** to audit and monitor the construction and installation of a petrochemical plant in Lithuania.

At regular intervals, SGS inspectors supervised the project progress and informed the RZB project team about the actual project status. SGS pointed at possible problems, confirmed costs spent and advised the RZB project team in defining and verifying due-diligence lists.

SGS supported the project very efficiently and complied with their tasks to our full satisfaction.

With best regards
